Final Reflections

- What will I still remember 5 years from now that I learned in this course?
- What advice would I give a friend about how to learn the most in this course?
- If I were to teach this course, how would I change it?
- What have I learned about how I learn in this course that I could use in my future computer science courses? In my career?
- What topics do I feel that I deeply understand, and what topics do I still feel uncertain about?...Why?
